Market Overview: There is a large supply and demand gap in China's elderly care market, and the Company's market share is expected to expand further.

Trend1: The aging population in China is intensifying, resulting in a heavier burden on younger generations to care for the elderly, thereby stimulating the growth in demand for elderly care services.

Trend2: The growth in supply of elderly care services struggles to match the increasing demand, posing significant challenges in meeting the needs effectively.

Drivers

Demand Side	Supply Side
Accelerating ageing	Supply-side growth < demand-side growth
Shrinking family size	Reduction in the number of elderly beds per 1,000 seniors since 2020
Heavier pressure to support the elderly
